2021-s Journal Impact Factor számolása

2021-s JCR kiadásban először emeltük be az early access tartalmat, 2020-tól

Az idei évben az early access tartalom a 2020-s és 2021-s tartalmat érinti

2021 JIF =

Citations in 2021 to items
published in 2019 + 2020

Number of articles & reviews
published in 2019 & 2020

Hogyan számoljuk a Journal Citation Indicatort

The **Journal Citation Indicator (JCI)**, a field-normalized metric, represents the average category-normalized citation impact for papers published in the prior three-year period.

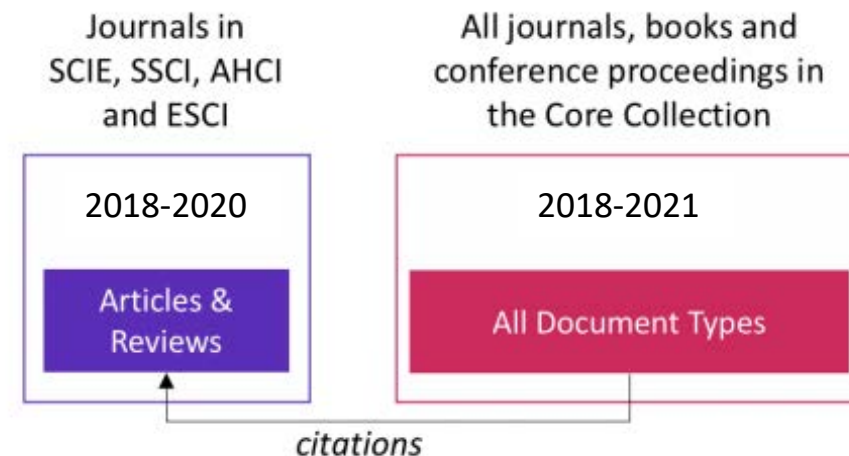

For example, the 2021 Journal Citation Indicator will be calculated for journals that published citable items (i.e., articles or reviews) in 2018, 2019 and 2020, counting all citations they received from any document indexed between 2018 and 2021.

The value of the Journal Citation Indicator is the mean Category Normalized Citation Impact (CNCI) for all articles and reviews published in the most recent three years (e.g., between 2018 and 2019 for the 2021 indicator value).
