PROXY SET-UP TO USE OUR E-RESOURCES FROM HOME GOOGLE CHROME BROWSER (v77.0.3)

Open the Chrome menu and click 'Settings'.

Scroll down to the bottom and click 'Advanced' option.

Manage search engines	Search engine used in the address bar	Google 💌

Local Area Network (LAN) settings LAN Settings do not apply to dial-up connections. Select Settings above for dial-up settings.	System	
	Continue running background apps when Google Chrome is closed	
OK Cancel Apply	Use hardware acceleration when available	
	Open proxy settings	12

The 'Address	' is: proxy.bibl.	u-szeged.hu and	the 'Port'	' number is: 3128
--------------	-------------------	-----------------	------------	-------------------

Click '**OK**' twice to save the new settings. Now open the library's website in the browser: <u>www.ek.szte.hu</u>.

An authentication window should pop up asking for your username and password.

	d password.
our connect	ion to this site is not private
sername:	123456789
assword:	•••••

The username is the number of your student/library/Erasmus card.

The password is auto generated from your date of birth in a given form: day (two characters), month (month's name in English, first three characters, capital letters) and the last two figures of the year.

EXAMPLE: September 4th, 1994 → 04-SEP-94

## DD-MMM-YY

Your password in our online catalogue is the same, so changing it will affect this one as well. The database of our registered users is refreshed in every 24 hours, therefore this service will not immediately be available for you after registration or in case you have to change your library card.

Your browser is now ready to use the library's e-resources.

## Ask us if you need help or more information: <u>e-help</u>.

## **Important!**

From the currently available browsers only the Mozilla Firefox has its own options for controlling the proxy settings, all the other browsers (Chrome, Opera, Edge, etc.) will modify the general Internet settings of your computer, so all the other installed browsers will be affected.

## We recommend to set up the proxy in Firefox to get access to the library's e-resources and use a different browser along with it to be able to use other public websites.

With only one installed browser your only option is to turn the proxy settings off and on, depending on what type of site you want to use.

Good luck with your search.
